**Role: Community Governor**

## **Job Role: Community Governor**

I have a background as an educator for over 7 years and have leadership experience at the modular, programme and doctoral level. I have led in different capacities in non-academic settings and have organised and planned different events for students.

I have a passion to impact the next generation by supporting them in their learning and development journey. I believe that ensuring that the educational path of the next generation is well structured and laid out will aid the production of well-grounded individuals/citizens in our community.
